

Adapted from Stuart Warren and Paul Wyatt Organic Synthesis: The Disconnection Approach, 2nd Ed., Wiley 2008

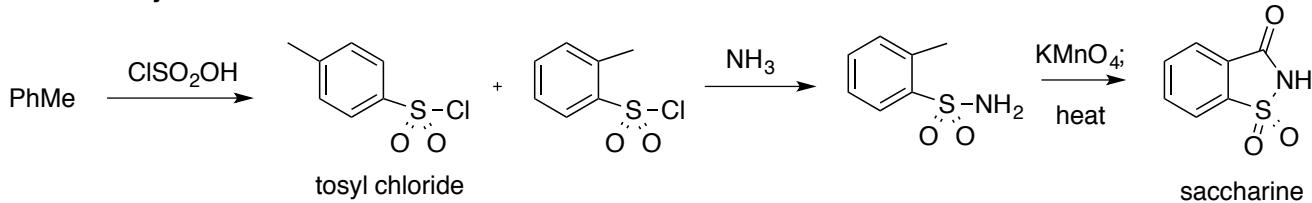

1. Provide a retrosynthetic analysis of and suggest a forward synthesis for the artificial sweetener saccharine. Propose why this artificial sweetner industry subsidized a reagent for converting alcohols into leaving groups.

Retrosynthetic analysis

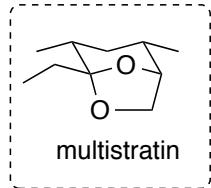

Forward synthesis

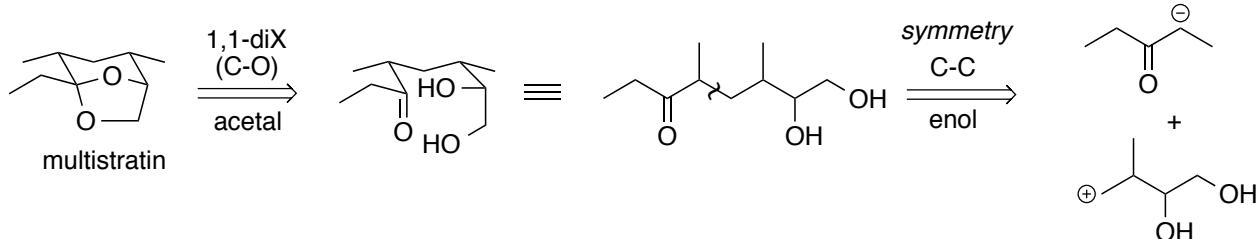

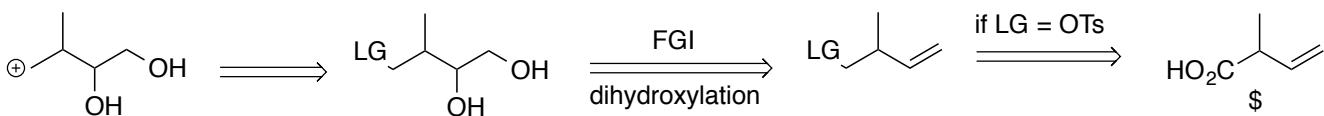

2. Provide a retrosynthetic analysis of and suggest a forward synthesis for the elm bark beetle pheromone multistriatin. *Junior Members:* Do not worry about stereochemistry.

Senior Members: Do worry about (relative) stereochemistry.
